<p>Gravity machines - the operator feeds material through an angled funnel, directly against the flywheel. Suitable for lighter brush and smaller jobs. Available with petrol engines or as PTO option for smaller tractors.</p> <p>Hydraulic machines use hydraulically driven feed rollers to feed the material onto the flywheel. Suitable for professional, high volume work, they are available in 3 forms - Towed, Tracked and PTO.</p> <p>Shredders will handle a wide variety of materials including green waste, plastics and cardboard.</p>
