

COMFORT SPACE

MOBILE WELFARE CABINS

INTRODUCING COMFORT SPACE:

The ultimate lightweight yet highly resilient Mobile Welfare Cabin.

This compact and lightweight single axle design makes it easy to transport to and from site and manoeuvre once there. The road towable Comfort Space requires no special transport and meets the H.S.E welfare on site standards. Electrical power is provided by the silenced integrated diesel generator, which provides lighting, warm water and microwave facilities for the preparation of food.

The unit can accommodate up to 6 persons at once, in comfort and features a canteen/rest area, toilet/washroom and a generator/drying room. With a hardwearing easy to clean interior finished in bright white GRP, the Comfort Space has an impressive list of features that exceed your on site requirements both now and in the future.

The Anti-vandal design incorporates high security features, ensuring the unit and items stored within remain secure whilst it is not occupied. The easy to set up system means the Unit can be operational within 3 minutes of arriving on site.

The Comfort Space is the mobile welfare unit of choice, for any company looking for a no fuss, durable and effective solution to meet the criteria for welfare on-site. What is more our Comfort Space is fully compatible with the new Eco-Assist system making our latest product the most flexible on the market.
