

The smallest dedicated tracked trencher on the market. Ideal for softer ground conditions due to an increase in rainfall, the new tracked trencher has a larger ground contact area than conventional tyres. This gives lower ground pressure and greater traction, as well as being steerable, so you can easily dig around those corners and bends without having to reposition the machine.

This excellent, versatile and eagerly awaited addition to the Barreto Trenching Range is coming soon to a HSC near you...

- Length: 233cm
- Width: 83cm
- Weight: 589kg
- Trenching depths: 24", 30" & 36"
- FWD speed: 190ft/min
- REV speed: 100ft/min
